BlockchainED Project: Aims to revolutionize Blockchain Education for Adult Learners

Press Release 1

The BlockchainED project – “Blockchain Technological Education and Innovation for Adult Lifelong Learning and Labor Market Skills”, is set to transform the landscape of blockchain education across Europe. Funded under the Erasmus+ program, this groundbreaking initiative seeks to address the current and future skill needs of the European blockchain workforce by upskilling adult educators and learners. The initiative consists of seven different organizations in EU, located in Austria, Cyprus, Greece, Italy, Poland, and Spain.

The project's objectives are ambitious and far-reaching.

- Firstly, BlockchainED aims to adopt a cross-sectoral and transnational approach to upskill adult educators and learners in blockchain technologies.
- Secondly, it seeks to create bridges of collaboration between blockchain experts and adult learners through knowledge-building camps, video-based narratives, and blockchain case resolution initiatives.
- Finally, BlockchainED will utilize a participatory action research approach for the co-development of project resources through the BlockchainED Scrutiny Panel.

Project Activities:

- Establishment of Local Feedback groups - the BlockchainED Scrutiny Panel comprising 30 experts from diverse backgrounds.
- BlockchainED Adult Educators eToolkit in six languages.
- 25 video-educational narratives featuring insights from blockchain experts.
- Training sessions for 50 adult educators and 120 adult learners.
- Organization of National BlockchainED 1-week camps with 120 adult learners

The expected results of the BlockchainED project are significant. It aims to create upskilling pathways for adult learners in blockchain skills development, thereby improving their employability and career prospects. Additionally, the project will enhance adult educators' competencies in blockchain technologies, cases, and good practices across various sectors. Ultimately, BlockchainED seeks to promote digital readiness among adults to address the shortage in the blockchain labor market and contribute to Europe's digital transformation.

About BlockchainED Project: This initiative aims to revolutionize blockchain education and innovation for adult lifelong learning and labor market skills. Through collaborative efforts and innovative approaches, the project seeks to bridge the gap between blockchain expertise and adult learners, paving the way for a more digitally skilled workforce in Europe.
