FOSTERING FINANCIAL LITERACY & CAREER READINESS THROUGH
GAMIFICATION IN VOCATIONAL EDUCATION

ABOUT GAMI.FI.RE

GAMIFIRE is on a mission to make financial literacy engaging and relatable for students through serious gaming. By turning complex financial challenges into fun, interactive experiences, we're helping students develop essential skills for real life. With input from VET students across Europe, we're creating a game that truly connects with its audience.

INTERACTIVE WORKSHOPS

Across four countries, classrooms became creative hubs where students took the lead. Through interactive workshops, they brainstormed, designed, and tackled real-world challenges that inspired the GAMIFIRE game. The student's energy and creativity have been key to shaping the project.

COLLABORATION IN CYPRUS

Cyprus brought it all together! A selection of the VET students joined us to test the game prototype, giving feedback that's helping us make it better than ever. In mixed groups, students, teachers, and experts worked side-by-side to design new challenges and scenarios for the game, combining their perspectives to create something truly impactful.

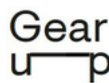

WHAT'S NEXT?

With all the ideas and feedback we've gathered, we're now fine-tuning the game to make it as fun and effective as possible. Thank you for being part of this exciting journey. Stay tuned, there's more to come!
